As Swissôtel Resort & Spa Çeşme, with an awareness of our responsibility for the Energy Management System, we adopt the continuous improvement of energy performance, enhancement of energy efficiency, and support for environmental and economic sustainability as fundamental principles in all our activities.

In this regard, we are committed to:

- Complying with applicable national and international energy legislation, standards, and other requirements to which our organization has committed;
- Using energy and natural resources efficiently in all our activities and operations, and continuously improving energy performance and energy efficiency;
- Identifying and evaluating opportunities for improving energy efficiency and energy performance, and implementing feasible energy efficiency projects;
- Contributing to the reduction of environmental impacts and greenhouse gas emissions arising from the use of energy resources;
- Evaluating new and alternative energy sources and technological solutions that improve energy efficiency, where applicable;
- Cooperating with all our stakeholders in energy management and increasing energy awareness among our employees, guests, visitors, and business partners;
- Evaluating energy-efficient products, equipment, systems, and technology alternatives that improve energy performance, and giving preference to suitable options within our procurement processes;
- Assessing energy risks and potential emergencies, such as restrictions in energy supply, and planning the necessary measures; reducing energy losses and, where feasible, utilizing waste heat and other energy recovery opportunities;
- Giving preference to technologies that improve energy performance in hotel buildings, facilities, systems, and equipment, and evaluating high-energy-performance and energy-efficient solutions in new investments;
- Taking energy performance into consideration in energy-related procurement, design, renovation, and refurbishment activities;
- Regularly reviewing and improving our documented Energy Management System and integrating it into our organizational management practices.

With the participation of our entire team, we are committed to providing the necessary resources and support for the implementation, maintenance, and continual improvement of the Energy Management System.
