

PEELINGS

With their highly concentrated formulas and low pH levels, our NOON and PRX-T33 peels work intensively on the skin. These peels effectively treat acne, skin aging, dryness, rosacea, pigmentation issues, and improve overall skin health.

NOON Peeling 60 minutes €115

With the NOON brand, we use various types of peels for multiple indications such as acne, anti-aging, pigmentation, or dry/sensitive skin. We combine different peels in one treatment, including skin cleansing, serums, and masks.

Immediately after the treatment, you will see a beautiful glow, and ultimately, the skin condition will improve.

PRX-T33 Peeling 30 minutes €115

This treatment uses PRX-T33 alone, perfect for people who want no downtime and immediate results. We use it for anti-aging, skin texture improvement, pigmentation reduction, and increased skin volume. Immediately after the treatment, your skin will have a beautiful glow and look more radiant.

All the above treatments are performed by one of our skin therapists.

PEELINGS COMBINED WITH MICRONEEDLING

Skin-enhancing treatments to deliver active ingredients deeper into the skin. The combination ensures optimal results on skin texture, pigmentation and glow.

Vitamin C glow facial 60 minutes €170

The Vitamin C Glow Facial involves using two mild peels to prepare and stimulate the skin. Then, 70% vitamin C is applied and penetrated deeper into the skin using microneedling. Vitamin C acts as an important antioxidant to firm the skin and protect it better during the summer. It also brightens pigmentation. Hyaluronic acid is then used to deeply hydrate the skin, followed by a hydrating mask to calm the skin and allow the vitamin C to penetrate even deeper.

After this treatment, the skin will be red, but once fully healed, it will have a beautiful glow.

Reveal & Protect treatment 60 minutes €170

This treatment is similar to the above but focuses more on reducing pigmentation. We start with two mild peels, then apply a combination of tranexamic acid and vitamin C, which is penetrated deeper into the skin using microneedling. The same process is followed with hyaluronic acid, and we finish with a mask focused on reducing pigmentation.

The skin will be red immediately after the treatment and will need time to recover. However, after a few days, you will have a beautiful glow, and the optimal result, including reduced pigmentation, will be visible after four weeks.

SRS Protocol for dark circles and skin aging 60 minutes €170

This is a milder treatment that nourishes the skin with a cocktail of various active ingredients. We start with a mild peel, then use microneedling to penetrate the active ingredients deeper into the skin. The treatment is completed with a hydrating mask and various serums.

The skin will be red after the treatment, but after a few days, it will look more radiant and less dull. This is also a great treatment in a series to reduce pigmentation around the eyes.

PRX with microneedling 60 minutes €185

PRX-T33 is a peel using high concentrations of active ingredients without the usual downtime. This peel targets wrinkle and line reduction, pigmentation reduction, skin texture improvement, and increased volume. We also combine this treatment with microneedling to enhance the peel's effects.

The skin will be red after the treatment and needs a few days to recover. Optimal results are visible after four weeks.

OXYGENEO

This is a revolutionary 3-in-1 anti-aging treatment providing immediate results. It combines oxygen therapy to deliver active ingredients, Tripollar for collagen production and skin rejuvenation, and ultrasound to deliver nourishing serums into the skin.

OxyGeneo short 30 minutes €79,95
